Zentiva Private Limited

Plot No. 3501 to 3515, 6301 to 6313 & 16.0 meter road/c, GIDC Estate, Ankelshwar-393 002,Dist.: Bharuch, Gujarat State

Bio-Medical Waste (BMW) details for the Month of Jan - 2025

DIO-Medical Waste (DMW) details for the Month of San - 2023							
Waste description	Waste Category	Unit	Opening stock	Quantity generated for the month	Total stock during month	Disposal to Authorized CBWTF	Balance quantity
a) Human Anatomical Waste: (Human tissues, organs,body parts and fetus below the viability period)	Yellow	Kg	0	0	0	0	0
b) Animal Anatomical Waste : (Experimental animal,carcasses,body parts,organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.)	Yellow	Kg	0	0	0	0	0
c) Soiled Waste: (Items contaminated with blood, body fluids like dressings, plaster casts,cotton swabs and bags containing residual or discarded blood and blood components)	Yellow	Kg	0	0.096	0.096	0.096	0
d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics,cytotoxic drugs including all items contaminated with cytotoxic drugs along with glass or plastic ampoules,vials etc.	Yellow	Kg	0	0.046	0.046	0.046	0
e) Chemical Waste: (Chemicals used in production of biological and used or discarded disinfectants)	Yellow	Kg	0	0	0	0	0
(f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants, Silver X-ray film developing liquid, discarded Formalin, infected secretions, aspirated body fluids, liquid from laboratories and floor washings, cleaning, housekeeping, and disinfecting activities etc)	Yellow	Kg	0	0	0	0	0
(g) Discarded linen, mattresses, beddings contaminated with blood or body fluid.	Yellow	Kg	0	0	0	0	0
(h) Microbiology, Biotechnology and other clinical laboratory waste: (Blood bags, Laboratory cultures, stocks or specimens of microorganisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and devices used for cultures)	Yellow	Kg	0	4.945	4.945	4.945	0
Contaminated Waste (Recyclable): (a) Wastes generated from disposable items such as tubing, bottles, intravenous tubes and sets, catheters,urine bags,syringes (without needles and fixed needle syringes) and vaccutainers with their needles cut) and gloves.	Red	Kg	0	1.245	1.245	1.245	0
Waste sharps including Metals: Needles, syringes with fixed needles, needles from needle tip cutter or burner, scalpels, blades, or any other contaminated sharp object that may cause puncture and cuts. This includes both used, discarded and contaminated metal sharps	White (Translucent)	Kg	0	0.056	0.056	0.056	0
a) Glassware: Broken or discarded and contaminated glass including medicine vials and ampoules except those contaminated with cytotoxic wastes.	Blue	Kg	0	1.311	1.311	1.311	0
(b) Metallic Body Implants	Blue	Kg	0	0	0	0	0
	a) Human Anatomical Waste: (Human tissues, organs,body parts and fetus below the viability period) b) Animal Anatomical Waste: (Experimental animal,carcasses,body parts,organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Soiled Waste: (Items contaminated with blood, body fluids like dressings, plaster casts,cotton swabs and bags containing residual or discarded blood and blood components) d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics,cytotoxic drugs including all items contaminated with cytotoxic drugs along with glass or plastic ampoules,vials etc. e) Chemical Waste: (Chemicals used in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants, Silver X-ray film developing liquid, discarded Formalin, infected secretions, aspirated body fluids, liquid from laboratories and floor washings, cleaning, housekeeping, and disinfecting activities etc) (g) Discarded linen, mattresses, beddings contaminated with blood or body fluid. (h) Microbiology, Biotechnology and other clinical laboratory waste: (Blood bags, Laboratory cultures, stocks or specimens of microorganisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and devices used for cultures) Contaminated Waste (Recyclable): (a) Wastes generated from disposable items such as tubing, bottles, intravenous tubes and sets, catheters, urine bags, syringes (without needles and fixed needle syringes) and vaccutainers with their needles cut) and gloves. Waste sharps including Metals: Needles, syringes with fixed needles, needles from needle tip cutter or burner, scalpels, blades, or any other contaminated sharp object that may cause puncture and cuts. This includes both used, discarded and contaminated m	a) Human Anatomical Waste: (Human tissues, organs, body parts and fetus below the viability period) b) Animal Anatomical Waste: (Experimental animal, carcasses, body parts, organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Soiled Waste: (Items contaminated with blood, body fluids like dressings, plaster casts, cotton swabs and bags containing residual or discarded blood and blood components) d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics, cytotoxic drugs including all items contaminated with cytotoxic drugs along with glass or plastic ampoules, vials etc. e) Chemical waste: (Chemicals used in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated from aliancies and floor washings, cleaning, housekeeping, and disinfecting activities etc) (g) Discarded Inen, mattresses, beddings contaminated with blood or body fluid. (h) Microbiology, Biotechnology and other clinical laboratory waste: (Blood bags, Laboratory cultures, stocks or specimens of microorganisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and devices used for cultures) Contaminated Waste (Recyclable): (a) Wastes generated from disposable items such as tubing, bottles, intravenous tubes and fixed needle syringes) and vaccutainers with their needles cut) and gloves. Waste sharps including Metals: Needles, syringes with fixed needles, needles from needle	a) Human Anatomical Waste: (Human tissues, organs, body parts and fetus below the viability period: (Experimental animal, carcasses, body parts, organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Soiled Waste: (Items contaminated with blood, body fluids like dressings, plaster casts, cotton swabs and bags containing residual or discarded blood and blood components) d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics, cytotoxic drugs including all Items contaminated with cytotoxic drugs along with glass or plastic ampoules, vials etc. e) Chemical Waste: (Chemical Waste: (Chemical used in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants, Silver X-ray film developing liquid, discarded Formalin, infected secretions, aspirated body fluids, liquid from laboratories and floor washings, cleaning, housekeeping, and disinfecting activities etc) (g) Discarded linen, mattresses, beddings contaminated with blood or body fluid. (h) Microbiology, Biotechnology and other clinical laboratory waste: (Blood bags, Laboratory cultures, stocks or specimens of microorganisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and devices used for cultures) Contaminated Waste (Recyclable): (a) Wastes generated from disposable items such as tubing, bottles, intravenous tubes and sets, catheters, urine bags, syringes (without needles and fixed needle syringes) and vaccutainers with their needles cut) and gloves. Waste sharps including Metals: Needles, syringes with fixed needles, needles from needle tip cutter or burner, scalp	Waste description Waste Category Unit Opening stock a) Human Anatomical Waste: (Human Issues, organs, body parts and fetus below the viability period) b) Animal Anatomical Waste: (Experimental animal, carcasses, body parts, organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Soiled Waste: (Items contaminated with blood, body fluids like dressings, plaster casts, cotton swabs and bags containing residual or discarded blood and blood components) d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics, cytotoxic drugs including all items contaminated with cytotoxic drugs along with glass or plastic ampoules, vials etc. e) Chemical Waste: (Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded disinfectants) (f) Chemical Liquid Waste: (Liquid waste generated due to use of chemicals in production of biological and used or discarded offinal, including secretions, aspirated body fluids, liquid from laboratories and floor washings, cleaning, housekeeping, and disinfecting activities etc) (g) Discarded linen, mattresses, beddings contaminated with blood or body fluid. (li) Chemical Liquid Waste etc. (Blood bags, Laboratory cultures, stocks or specimens of microorganisms, live or attenuated vaccines, human and animal cell cultures used in research, industrial laboratories, production of biological, residual toxins, dishes and edvices used for cultures) Contaminated Waste (Recyclable); (a) Wastes generated from disposable items such as tubing, bottles, intravenous tubes and sete, catheters, urine bags, syringes (without needles and fixed needles, needles from needle tip cutter or burner, scalpels, blades, or any other contaminated sharp object that may cause puncture and cust. This includes both used, discarded and contaminated with cytotoxic wastes.	Waste Category Unit Opening generated for the month of the Waste Category Unit Opening generated for the month of the viability period) b) Animal Anatomical Waste: (Experimental animal carcasses, body parts, organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Solide Waste: (Experimental animal carcasses, body parts, organs, tissues, including the waste generated from animals used in experiments or testing in veterinary hospitals or colleges or animal houses.) c) Solide Waste: (Items contaminated with blood, body fluids like dressings, plaster casts, cotton swabs and bags containing residual or discarded blood and blood components) d) Expired or Discarded Medicines: (Pharmaceutical waste like antibiotics, cylotoxic drugs including all flems contaminated with cylotoxic drugs along with glass or plastic ampoules, viais etc. e) Chemical Waste: (Chemicals used in production of biological and used or discarded disinfectants) d) Expired or Discarded Medicines: (Chemicals used in production of biological and used or discarded disinfectants) d) Chemical Liquid Waste: (Liquid Waste: (Liquid waste) generated due to use of chemicals in production of biological and used or discarded disinfectants. Silver X-ray film developing liquid, discarded Formalin, infected secretions, apsirated body fluids, liquid from laboratories and floor washings, cleaning, housekeeping, and disinfecting activities etc. (g) Discarded linen, mattresses, beddings contaminated with blood or body fluid. (i)	Waste Category Unit Opening stock Total stock during month (thuman itsues, organs, body parts and fetus below the viability period) O	Waste Category Unit Opening stock Caunitity generated (uning month of CBWTF (Uninan Itssues, organs, body parts and fetus below the validity period) 0 0 0 0 0 0 0 0 0
